## Section 0: Express Setup Guide (ESG)

The ESG facilitates getting a PIP operational quickly.  
It hopefully contains just enough info for that.

Tool Box Button #19 defaults to the ESG,  
Which is at

[C:\PIP\Software\User\\_Guide\Express\\_Setup\\_Guide.pdf](C:\PIP\Software\User_Guide\Express_Setup_Guide.pdf)

On the other hand,  
This PIP User Manual contains many more details  
And is the reference for PIP users.

# Section 1: Overview

- ❖ [Background](#)
- ❖ [Desktop](#)
- ❖ [PIP Tool Box Primer](#)
- ❖ [Express Setup](#)

## ❖ Background

**This guide is the reference to PIP hardware and software, i.e. operating a PIP.  
PIPs Record Falling Precipitation and  
Produces Figures, Tables and Movies**

### **Input**

**Video logging at ~380 frames per second for entire seasons (24/7).**

### **Output**

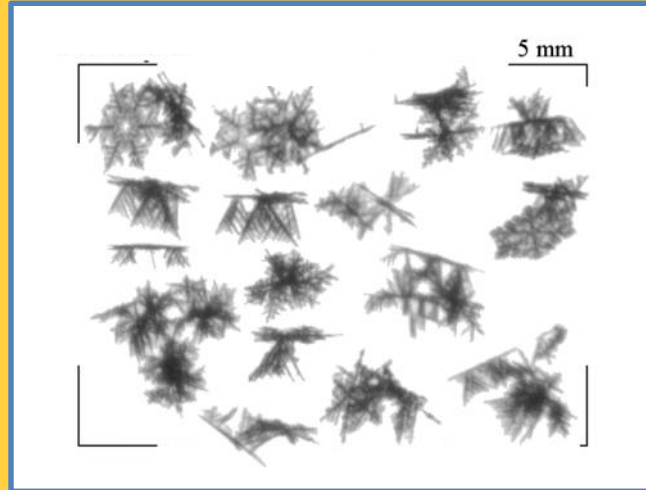

- ✓ **Visualizations: show particle motion,**
- ✓ **Tables: facilitate user analysis and**
- ✓ **Plots: display common products.**

### **Operations**

**Each PIP is calibrated before shipping, so it is ready to use – out of the box.  
You can learn to operate your PIP inside, then install it at your field site.**

## Visualize: Movie

Click on pic to see PIP movie of falling precipitation.

PIPs record all video images to \*.pvi files,  
A compression algorithm developed at GSFC is used.

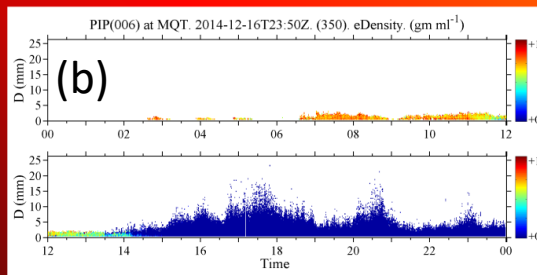

PVI format is useless for watching movies with generally available apps.  
Therefore a PIP app makes \*.avi files.

A movie is made for each minute with precipitation.  
Each movie shows the first 2000 frames with particles.

# Quantify with Figures: Daily Summary

## PIP at MQT. 2014/12/16.

**Rain** and **not-Rain**  
Measured  
*Independently and  
Simultaneously!*

Time Series  
Of not-Rain  
Density  
( Cold Front )

High Speed Video Images Yield  
(a) Particle Size Distributions  
(b) Fall Velocity Distributions

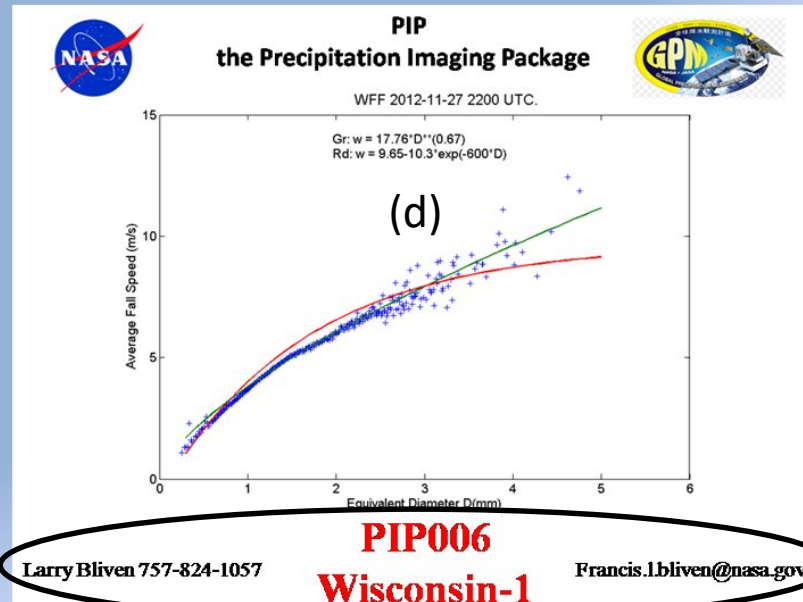

Models Produce  
(d) Rain & not-Rain Water Flux  
(c) Density Estimates

Quantify with Tables: They exist for data in all figures  
And for accumulations (by day and by minute).

# ❖ Desktop

(a)

(b)

(c)

When a PIP-PC boots, the desktop should look like this one.

(a) the PIP Tool Box connects to routine processes.

(b) Handy reference stuff.

(c) Icons of running PIP apps (video recording\processing).

(d) The first rain event monitored by a PIP shows excellent agreement between measured fall speeds and models.

# ❖ PIP Tool Box Primer

You select commonly used processes and products.

Note that by default, Button #20 displays this quick guide, which is also in the User Manual (#1).

PIP Tool Box

Button	Tip	Description
1. User Manual	How operate a PIP	1. Quick setup guide. 2. Operations Details 3. Example Data Products
2. Hardware	Lamp & Camera Details	Run National Instruments NI IMAQ app, which (a) enables physical alignment of camera to lamp, (b) adjustment of light intensity gain, and (c) setting of other camera options. Useful for PIP installation and then for periodically checking light bulb.
3. Setup File	Software Control File for all PIP Apps	Control all PIP Apps from a single setup file. ASCII text file. Descriptor, tab, the instruction. *Must* have tab!
4. Log File	Listing of PIP_3 operations.	Daily file shows PIP_3 progress by records containing time stamps and processing instructions. Useful for documentation and assessing system performance. Daily files are zipped to the Zip directory.
5. Dir	Directory of PIP Products	Windows Explorer to the root for data products from PIP-1, PIP-2 and PIP3.
6. Movie Now	Recent Precipitation AVI	(1) To see what recent precipitation looks like, goto the most recent precipitation AVI , which is C:\PIP\Current_Weather\Recent_Lar.avi.zip. (2) Note that largest AVI for each 10 minute interval is located in root_1\PIP_3\10_Summary\Movies, where Analysis Root Directory_1 is defined in the Setup File. (3) AVIs for each minute of precipitation are in root2\PIP_2\q_Viewer, where Analysis Root Directory_2 is defined in the Setup File.
7. Figures All	Daily Summary Figures	DSD, Vel, eDen, P Summary Plot for each days. This 4-Figure presentation displays the basic input and output, i.e. DSD & Vel distributions, as well as the volume average density by minute and the rain & not-rain precipitation rates by minute. Additionally, Rain and not-Rain accumulations are presented.
8. Figures Now	Today's Summary Plot	Current Conditions: DSD, Vel, eDen, P Summary Plot. This 4-Figure presentation displays the basic input and output, i.e. DSD & Vel distributions, as well as the volume average density by minute and the rain & not-rain precipitation rates by minute.. Additionally, Rain and not-Rain accumulations are presented.
9. PSD Vel	Daily PSD & Velocity Summary	Time history of PSD, Fall Velocity, Relative Fall Velocity and Fall Speed Variability. Visual display of storm characteristics. Fall Speed by Size for each 10 minute increment.
10. Vel	Today's 10 Minute Fall Velocity Plots	Visualization of storm evolution by particle size. Rain and not-rain fall speed changes are useful for seeing frontal passage and other features. See (a) root_1\PIP_3\10_Velocity_Ebar and (b) root_1\PIP_3\10_Velocity_Plots_seg for mean & error bar, as well as individual particle fall speeds. For daily archiving, these are zipped to the Zip Directory.

PIP Tool Box

Button	Tip	Description
11. Task Mngr	What's running?	Windows TaskManger shows which Apps are running.
12. Scheduler	Schedule Startup Apps	Run Windows Scheduler and Goto PIP subdirectory. Turn on PIP startup apps (Tool_Bar and PIP_123). Note that Tool_Bar is always useful, however for setup, PIP_123 should not be running. Use button 14. Kill PIP as necessary.
13. Run PIP	*Run* PIP App	Run PIP_1, PIP_2, PIP_2a, and PIP_3 apps as desired.
14. Kill PIP	*Kill* PIP Apps	Kill PIP_1, PIP_2, PIP_2a, and PIP_3 apps as desired.
15. Re-Start PIP	*Re-Start* PIP Apps	Re-Start PIP_1, PIP_2, PIP_2a, and PIP_3 apps as desired.
16. PC Health	Monitor PC Temperature	Check Temps to ensure cool operations, i.e. don't want to see temperatures in the 60's degree C.
17. Fig/Tables Web	Figures and Tables for Web	Daily tables and figures in one place enables backup and web distribution.
18. Movie Web	Movies for Web	Daily AVI's enables backup and web distribution.
Button_19.bat	Link to an app of your choice	This button links to: C:\PIP\Software\Setup\Tools_16\button_19.bat At NWS-MQT, links to URL for MRR-PIP daily figures.
Button_20.bat	Link to an app of your choice	This button links to: C:\PIP\Software\Setup\Tools_16\button_20.bat At NWS-MQT, links to this file.

Right Click = Description

## Section 2: Hardware

- ❖ Hardware Components
- ❖ Calibration
- ❖ Alignment

# ❖ Hardware Components

This PIP is located at the GPM field site at NASA Wallops Flight Facility. Outside are (1) the high speed video-camera and (2) the halogen lamp.

Inside there is (3) the PIP workstation, which is connected via (4) Ethernet cable to the camera.

# ❖ Calibration

Each PIP is calibrated at NASA WFF.

The camera points at a meter stick that is located in the focal plane at  $\sim 133$  cm and the lens is adjusted such that the horizontal length of the image is  $\sim 6.4$  cm.

The lens components are then locked in place.

**Lens adjustments are secured in the lab at WFF,  
So PIP calibration is permanent,  
i.e. there are no user adjustments.**

**To see your Calibration,  
go to C:\PIP\Software\Calibration**

**PC Time Zone Must Be UTC!  
Clock Time Must Be Correct!**

# ❖ Alignment

## ○ Initial Alignment

A string provides rough alignment between the camera housing and the lamp.  
Then go to Fine Alignment (next page).

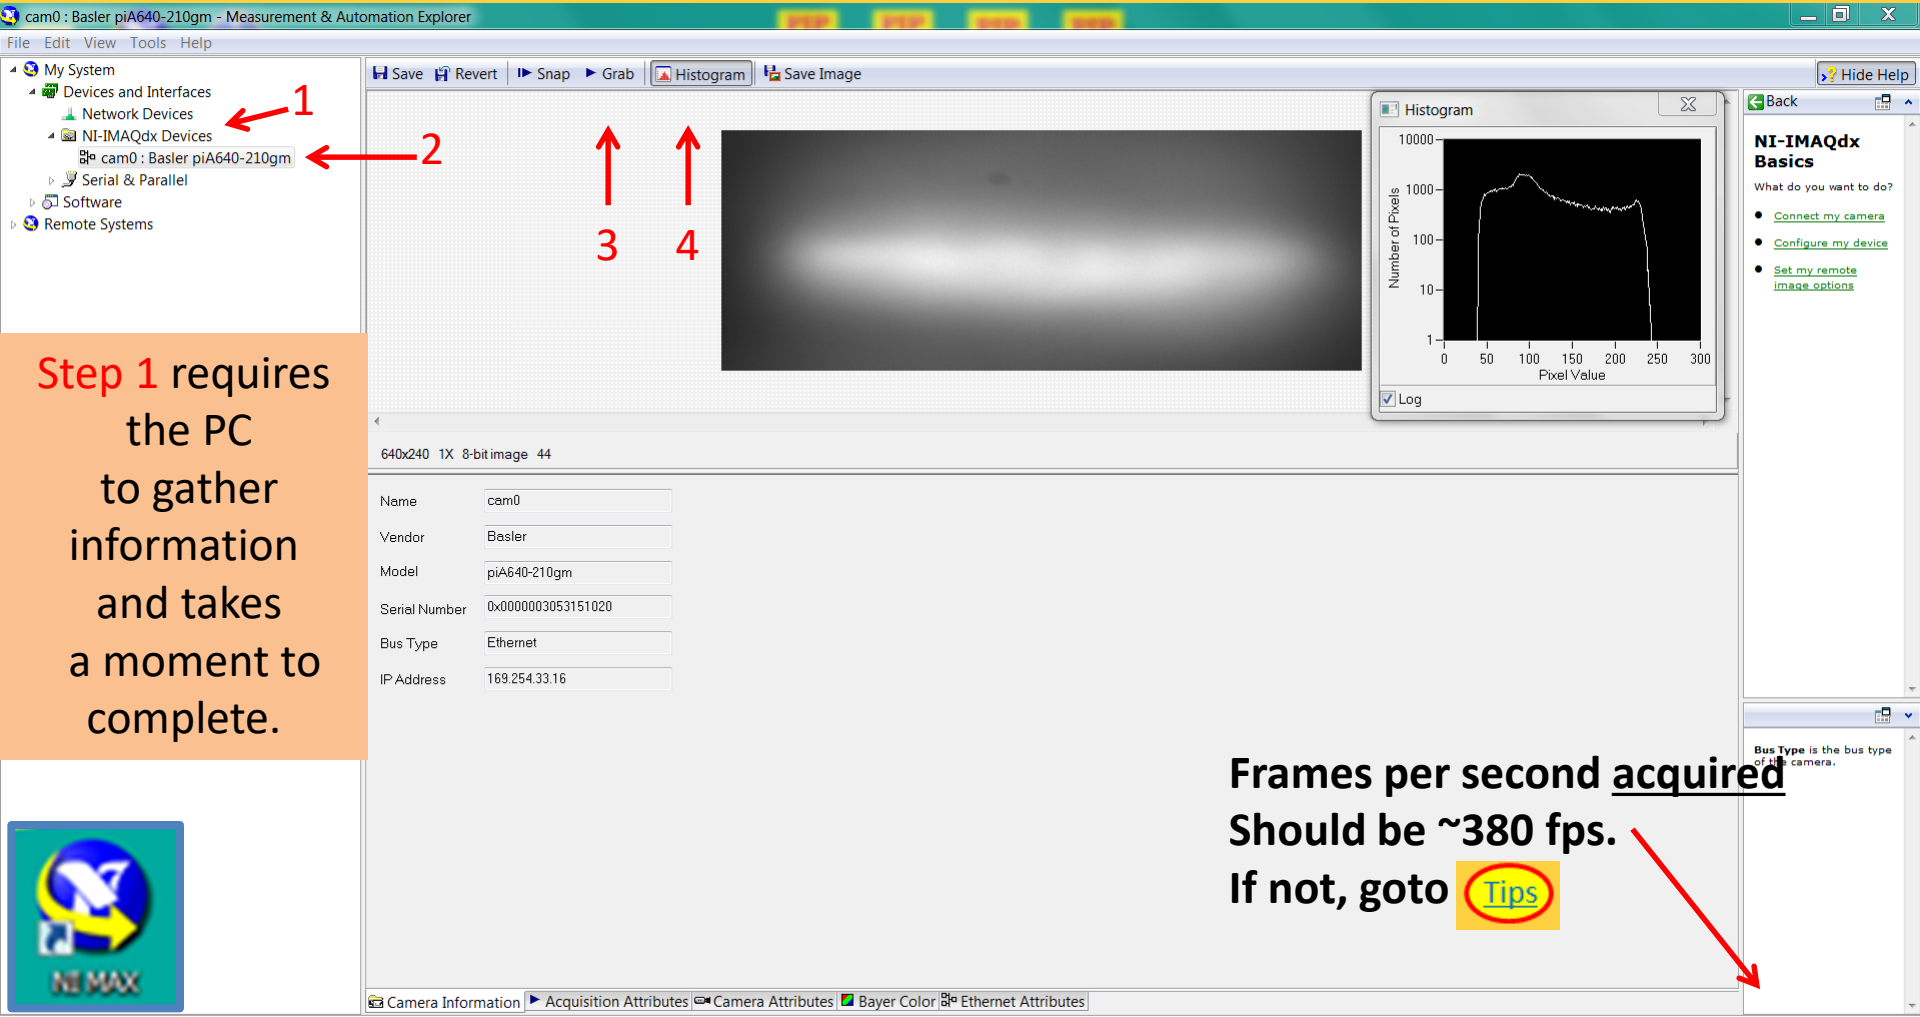

String

String

# o Fine Alignment

Adjust things so that light from the halogen lamp is centered.  
Move the camera and/or lamp to get the NI-MAX image to look like this one,  
Then adjust the Gain (next page).

Step 1 requires the PC to gather information and takes a moment to complete.

Frames per second acquired  
Should be ~380 fps.  
If not, goto **Tips**

# ○ Falling Drops Adju

Click on the center image to see an example video.

## Section 2: Software

- ❖ [PIP Tool Box Clusters](#)
- ❖ [Tips](#)

## ❖ PIP-123 Apps

- PIP-1,
- PIP-2, PIP-2a,
- PIP-3

PIP apps run independently and/or in parallel.

During normal operations, they all are running.

Each app cycles continuously.

# PIP-1 App

V  
1

## PIP-1

- ✓ C:\PIP\Software\bin\A\_PIP\_3.exe (Labview)
- ✓ Purpose: Video acquisition and logging
- ✓ Input: video camera images. 380 frames per second at 640x240 pixels, 64x48 mm
- ✓ Output: Compressed video files (\*.piv). 8-bit grey-scale images. 10 minutes each.

**PC Time Zone Must Be UTC!  
Clock Time Must Be Correct!**

**Startup takes  
Awhile to  
Initialize  
Camera**

**Use this  
Kill button  
For clean  
Exit.**

## ○ PIP-2 App

PIP-2  
1/3

PIP-2  
2/3

PIP-2  
3/3

### PIP-2

- ✓ Purpose: Particle Tables with time stamps and various particle characteristics
- ✓ C:\PIP\Software\bin\PIP\_Particle\_Table\_Control\_1.exe (Labview)
- ✓ C:\PIP\Software\bin\PIP\_Particle\_Table\_Control\_2.exe (1 fires off 2&3)
- ✓ C:\PIP\Software\bin\PIP\_Particle\_Table\_Control\_3.exe
- ✓ Input: Compressed video files (\*.piv)
- ✓ Output: Particle table files. Ascii\_csv.dat (easy access) & binary\_format.pv2 (speed)
- ✓ 3-Particle Table apps run in parallel to reduce processing time
- ✓ No desktop display other than icon in task tray, i.e. runs hidden.

## ○ PIP-2a App

M  
2

### PIP-2a

- ✓ C:\PIP\Software\bin\PIP\_AVI\_Control\_1506.exe (Labview)
- ✓ Purpose: User friendly video files for falling particle visualizations
- ✓ Input: Compressed video files (\*.piv)
- ✓ Output: friendly video files (gray-scale.avi). Each minute, first 2000 images with particles.
- ✓ No desktop display other than icon in task tray, i.e. runs hidden.

# ○ PIP3 App

## PIP-3 (no icon displayed)

- ✓ C:\PIP\Software\bin\A\_PIP\_3.exe (Matlab)
- ✓ Purpose: Tables and Figures to characterize precipitation
- ✓ Input: Particle table files. binary\_format.pv2
- ✓ Output: Particle Tracking Tables, Velocity Tables & Plots, DSD Tables & Plots, etc.
- ✓ No desktop display, i.e. runs completely hidden.

Use Task Manager  
To See That  
PIP\_3 Is Running

# ❖ PIP Tool Box Clusters

the PIP Tool Box is organized  
by grouping buttons  
of similar tasks together  
In Clusters.

Particle tables contain time stamps and particle characteristics.  
The frame rate is ~380 fps, so particles are \*not\* independent –  
Indeed many particles can be identified and tracked between successive images.  
Particle table format is tab delimited ascii.

# PIP-3: Particle Size Distribution Example

PSD tables contain time stamped size distributions.

The frame rate is ~380 fps,

so *\*sub-sampling\** is used to help ensure independent observations.

Particle table format is tab delimited ascii.

12. Scheduler

12. Enable\disable PIP apps at bootup.

[12 Task Schlr.bat](#)

# ○ Task Manager

CPU Usage  
Should Normally Be  
<75%,  
It may bounce off of  
100% briefly.

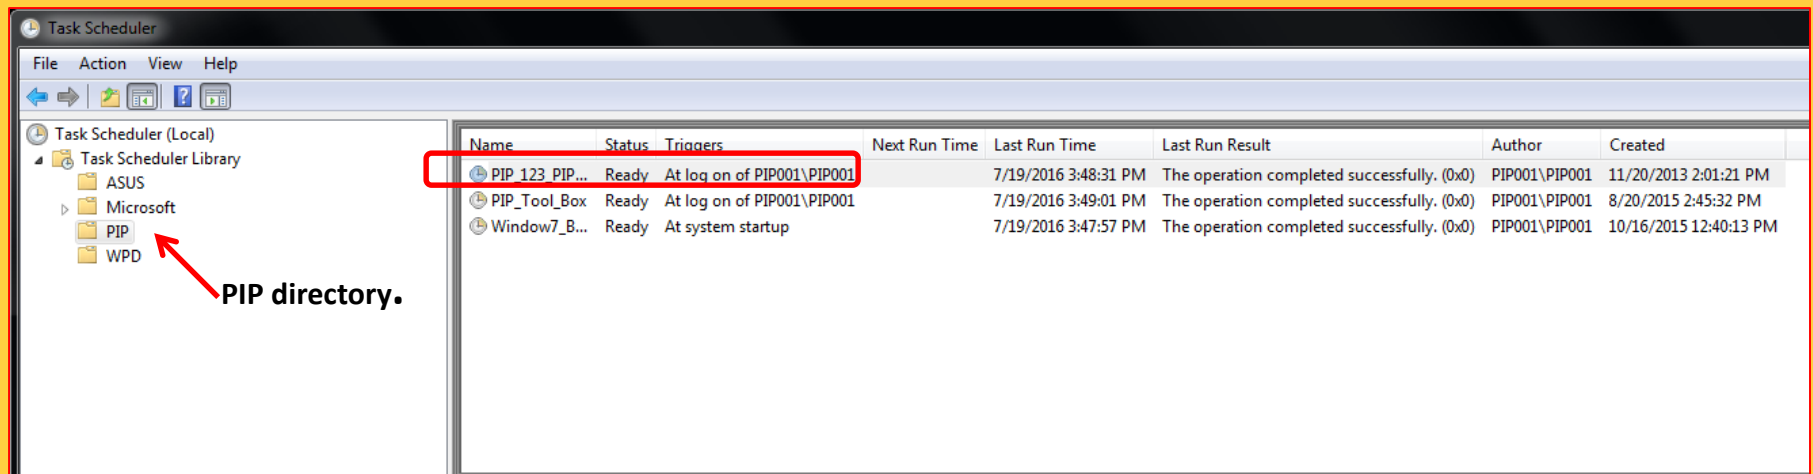

If it is persistently  
greater than  
85%,  
Kill some app,  
Such as PIP\_2a.

**Setup PIP to run automatically at boot.  
(Also recovers from power failures.)**

**Run the Windows Task Scheduler program.**

**Change Status of PIP\_123 to Enabled.**

**>> exit program. Re-boot. PIP should come up running the PIP Apps.**

## ❖ Run\Kill PIP Apps Cluster (13-15)

Button pads that turn PIP apps on\off.

Used extensively during app development. Also useful when an app or PC has issues. For example, if PC is running hot (>60 degrees C) due to cpu overload, kill PIP\_2a and Restart it during fair weather.

The image shows two side-by-side panels. The left panel, titled 'PIP Tool Box', contains a grid of 20 buttons numbered 1 to 20. Buttons 1-12 are light green, 13-14 are light blue, 15 is light green, 16 is black, 17-18 are light green, and 19-20 are light green. The right panel, titled 'Re-Start PIP Apps', contains five light green buttons numbered 1 to 5, and a black 'EXIT' button at the bottom. Below the grid in the left panel, it says 'Mouse Roll Over = Tip' and 'Right Click = Description'.

2. PIP_2 (Particle Talbes)
3. PIP_2a (AVI Movies)
4. PIP_3 (Products)
5. Run All
EXIT

13. Run PIP

13. When PIP apps are \*not\* running, click button #13 to selectively start PIP apps.

[Start PIP apps](#)

14. Kill PIP

14. When PIP apps are running, click button #14 to selectively kill PIP apps.

[Kill PIP apps](#)

15. Re-Start PIP

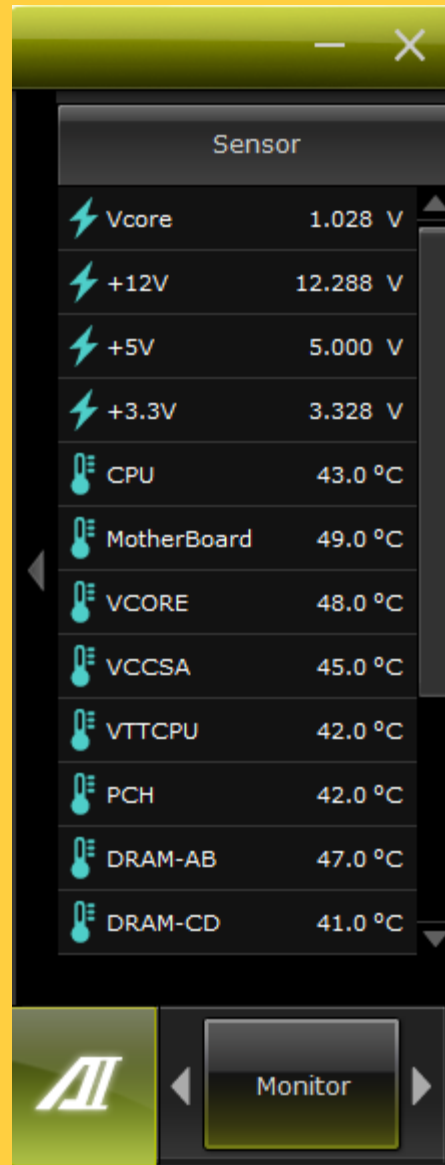

15. Whenever, click button #15 to selectively re-start PIP apps.

[Re-Start PIP apps](#)

16. Check PC conditions, especially temperature.

[16\\_PC\\_Health.bat](#)

< 60 degrees C ok.  
Otherwise, kill PIP\_2a (avi) and  
Restart it in fair weather.

Note that PIP apps are started  
From bat files that set  
Their priority – in order  
To Avoid overheating.

## ❖ Web Ready PIP Products Cluster (17-18)

Pointers to directories with summary material for website distribution.

These directories can be mirrored to other computers.

# ○ Fig\Tables Web

Summary figures for web distribution.

Results are updated as new material becomes available.

**Figures Folders** include PSD-Vel Summary Figures and Daily Summary Figures.

## ○ Movie Web

These Folders contain summary movies for web distribution.

Results are updated as new material becomes available.

**Archive\_Movies Folders** include the largest avi from each 10 minute interval.

The movie folder is separated from the Tables\Fig folder because avi's are much larger, So they may\may not be in an automated download sequence.

PIP Tool Box

Button	Tip	Description
1. User Manual	How operate a PIP	1. Quick setup guide. 2. Operations Details 3. Example Data Products
2. Hardware	Lamp & Camera Details	Run National Instruments NI IMAQ app, which (a) enables physical alignment of camera to lamp, (b) adjustment of light intensity gain, and (c) setting of other camera options. Useful for PIP installation and then for periodically checking light bulb.
3. Setup File	Software Control File for all PIP Apps	Control all PIP Apps from a single setup file. ASCII text file. Descriptor, tab, the instruction. *Must* have tab!
4. Log File	Listing of PIP_3 operations.	Daily file shows PIP_3 progress by records containing time stamps and processing instructions. Useful for documentation and assessing system performance. Daily files are zipped to the Zip directory.
5. Dir	Directory of PIP Products	Windows Explorer to the root for data products from PIP-1, PIP-2 and PIP3.
6. Movie Now	Recent Precipitation AVI	(1) To see what recent precipitation looks like, goto the most recent precipitation AVI, which is C:\PIP\Current_Weather\Recent_Lar.avi.zip. (2) Note that largest AVI for each 10 minute interval is located in root_1\PIP_3\10_Summary\Movies, where Analysis Root Directory_1 is defined in the Setup File. (3) AVIs for each minute of precipitation are in root2\PIP_2\q_Viewer, where Analysis Root Directory_2 is defined in the Setup File.
7. Figures All	Daily Summary Figures	DSD, Vel, eDen, P Summary Plot for each days. This 4-Figure presentation displays the basic input and output, i.e. DSD & Vel distributions, as well as the volume average density by minute and the rain & not-rain precipitation rates by minute. Additionally, Rain and not-Rain accumulations are presented.
8. Figures Now	Today's Summary Plot	Current Conditions: DSD, Vel, eDen, P Summary Plot. This 4-Figure presentation displays the basic input and output, i.e. DSD & Vel distributions, as well as the volume average density by minute and the rain & not-rain precipitation rates by minute. Additionally, Rain and not-Rain accumulations are presented.
9. PSD Vel	Daily PSD & Velocity Summary	Time history of PSD, Fall Velocity, Relative Fall Velocity and Fall Speed Variability. Visual display of storm characteristics.
10. Vel	Today's 10 Minute Fall Velocity Plots	Fall Speed by Size for each 10 minute increment. Visualization of storm evolution by particle size. Rain and not-rain fall speed changes are useful for seeing frontal passage and other features. See (a) root_1\PIP_3\10_3_1_Velocity_Ebar and (b) root_1\PIP_3\10_3_0_Velocity_Plots_seg for mean & error bar, as well as individual particle fall speeds. For daily archiving, these are zipped to the Zip Directory.

PIP Tool Box

Button	Tip	Description
11. Task Mngr	What's running?	Windows Task Manger shows which Apps are running.
12. Scheduler	Schedule Startup Apps	Run Windows Scheduler and Goto PIP subdirectory. Turn on PIP startup apps (Tool_Bar and PIP_123). Note that Tool_Bar is always useful, however for setup, PIP_123 should not be running. Use button 14. Kill PIP as necessary.
13. Run PIP	*Run* PIP App	Run PIP_1, PIP_2, PIP_2a, and PIP_3 apps as desired.
14. Kill PIP	*Kill* PIP Apps	Kill PIP_1, PIP_2, PIP_2a, and PIP_3 apps as desired.
15. Re-Start PIP	*Re-Start* PIP Apps	Re-Start PIP_1, PIP_2, PIP_2a, and PIP_3 apps as desired.
16. PC Health	Monitor PC Temperature	Check Temps to ensure cool operations, i.e. don't want to see temperatures in the 60's degree C.
17. Fig/Tables Web	Figures and Tables for Web	Daily tables and figures in one place enables backup and web distribution.
18. Movie Web	Movies for Web	Daily AVI's enables backup and web distribution.
Button_19.bat	Link to an app of your choice	This button links to: C:\PIP\Software\Setup\Tools_16\button_19.bat At NWS-MQT, links to URL for MRR-PIP daily figures.
Button_20.bat	Link to an app of your choice	This button links to: C:\PIP\Software\Setup\Tools_16\button_20.bat At NWS-MQT, links to this file.

## Section 4: Tips Tips

- 1) PIP\_setup.txt controls all PIP apps. Use Tool Box button #3, edit as needed.
- 2) Camera exposure settings (advanced).

Camera exposure settings (advanced).  
Confirm that your settings are as shown.  
These are need for exposure time and frame rate!  
After adjustments, GoTo.

The screenshot shows the NI-IMAQdx Basics software interface. The main window displays a camera image and a histogram. The histogram shows a peak around 150 pixel values. The settings panel on the left is expanded to show 'Acquisition Controls'. A red box highlights the 'Acquisition Mode' section, which is set to 'Continuous'. Other settings include 'Acquisition Frame Count' (1), 'Trigger Control Implementation' (Legacy), 'Acquisition Start' (Off), 'Line 1' (Line 1), 'Rising Edge' (0.00000000), 'Timed' (Off), 'Exposure Time (Abs)' (28.00000000), 'Exposure Timebase' (14.00000000), 'Readout Time (Abs)' (2.00000000), 'Enable Acquisition Frame Rate' (checked), 'Acquisition Frame Rate (Abs)' (379.939210), 'Resulting Frame Rate (Abs)' (381.097561), and 'Frame Trigger Wait' (checked). The 'Averaging' section is set to 'Number of frames' (1). The 'Digital I/O Controls' section is also visible. The status bar at the bottom indicates 'Frames per second: 236, 379 (display)'. A 'GoTo' button is visible in the bottom right corner.

Setting	Value
Acquisition Mode	Continuous
Acquisition Frame Count	1
Trigger Control Implementation	Legacy
Acquisition Start	Off
Line 1	Line 1
Rising Edge	0.00000000
Timed	Off
Exposure Time (Abs)	28.00000000
Exposure Timebase	14.00000000
Readout Time (Abs)	2.00000000
Enable Acquisition Frame Rate	<input checked="" type="checkbox"/>
Acquisition Frame Rate (Abs)	379.939210
Resulting Frame Rate (Abs)	381.097561
Frame Trigger Wait	<input checked="" type="checkbox"/>
